

CommerceV3 Sales Tax Software Solution

OVERVIEW

The Exactor sales tax compliance software module enables merchants to calculate sales tax with a software module that can be fully integrated into the CommerceV3 shopping cart software.

Exactor developed the CommerceV3 sales tax compliance module for online retailers to enjoy the benefits of the Exactor sales tax compliance service in their CommerceV3 shopping carts. A merchant does not have to do any manual operations to get taxes calculated, and the taxes are seamlessly displayed in the CommerceV3 shopping cart. The Exactor sales tax module communicates with the Exactor merchant portal from within the shopping cart to determine the sales tax nexus and get the online sales tax returns generated automatically, so that merchants don't need to transfer any data from one system to another
