

# Drupal Commerce Sales Tax Software Solution

## OVERVIEW

The Exactor sales tax module allows businesses to calculate sales tax by using the module that is fully integrated into the Drupal Commerce platforms

The Exactor Drupal Commerce Sales Tax module was developed by Commerce Guys to let businesses integrate and benefit from the Exactor sales tax compliance service within their Drupal Commerce shopping carts. Once the Exactor merchant account is registered and the Exactor sales tax module is enabled, a merchant does not need to do anything else to calculate sales tax. The tax amounts are calculated and shown in the Drupal Commerce shopping cart, whereas the Exactor sales tax module in the shopping cart that communicates with the Exactor merchant portal generates sales tax returns, and a merchant doesn't need to get the data travel from one system to another.

## EXACTOR DRUPAL COMMERCE SALES TAX SOLUTION FEATURES:

- Compatible setup and customer service fees
- NO installation required owing to our module being fully integrated with Drupal Commerce. All you need is enable the Exactor sales tax module
- Complete & reliable tax calculations
- Industry-proof Address Verification Service
- Transparent mechanism of taxation during order checkout
- Sales taxes calculated line by line for orders with multiple delivery addresses

Exactor would like to take a chance to offer the Commerce Kickstart Sales Tax module and the Magento Sales Tax extension to get the popular shopping carts integrated with the professional sales and use tax compliance software.
