

# EFI Pace Sales Tax Software Solution

## OVERVIEW

The Exactor EFI Pace Sales Tax Software was developed to enable businesses to incorporate and benefit from the Exactor sales tax compliance service from within their EFI Pace system's invoices and sales orders. Once installed and setup, a merchant does not need to perform any additional functions calculating sales tax. The taxes are automatically calculated and seamlessly displayed in all transaction forms which require sales tax automation, and because the invoice and sales orders communicate with the Exactor System, the Exactor EFI Pace Sale Tax Plug-in generates tax returns without having to transfer data from one system to another. More detailed information about the Exactor Sales Tax Compliance Service including: Account Setup, Account Management, Reports, and Filing Returns are outlined in the Exactor User Guide, available for download from the "Help" tab within the Exactor Merchant Website. EFI Pace Sales Tax User Guide provides information specifically on installation and using of the Exactor plug-in in the EFI Pace ERP system.
