

Hybris Sales Tax Software Solution

OVERVIEW

The Exactor Hybris Ecommerce sales tax solution module was developed to integrate Exactor sales tax compliance software with Hybris Ecommerce platform and let the online retailers benefit from the functions it performs. Once a merchant is registered with Exactor and the Exactor Hybris Ecommerce module is connected, there's no need for any additional actions to obtain taxes in the shopping cart. The sales tax or Value Added Tax is displayed on checkout in the Hybris Ecommerce shopping cart, and since the shopping cart communicates with the Exactor merchant web portal, Exactor gets the online sales tax returns generated without a merchant transferring data from one system to another.

EXACTOR HYBRIS ECOMMERCE SALES TAX SOLUTION FEATURES:

- Feasible setup and customer service fees
- Installation is easy using our Hybris Ecommerce Installation & User Guide that outlines steps on installation and usage of the Exactor sales tax module in the Hybris Ecommerce platform
- Complete & accurate sales tax calculations
- USPS CASS certified Address Verification Service
- Module performance is transparent to users
- Item-based sales tax calculations, including multiple delivery invoices
- Installation and configuration is easy – download the Exactor Hybris Ecommerce sales tax module from your Exactor merchant account and get it connected in seconds.

Exactor is happy to offer the Spree Commerce Sales Tax plug-in and the X-Cart Sales Tax extension to get the popular shopping carts integrated with the professional sales and use tax compliance software.
