

# Microsoft Dynamics NAV Sales Tax Software Solution

## OVERVIEW

The Exactor Microsoft Dynamics NAV sales tax compliance software plug-in was developed to enable businesses to incorporate sales tax calculations from within their Microsoft Dynamics NAV sales/purchase orders and invoice forms. Once installed and set up, a merchant does not need to perform any additional functions to obtain sales and use taxes. The taxes are automatically calculated and seamlessly displayed in the sales/purchase orders and invoices, and because the sales/purchase orders and invoices communicate with the Exactor System, the Exactor Microsoft Dynamics NAV Sales Tax Compliance Plug-in generates online sales tax returns without a merchant having to transfer data from one system to another.

Microsoft Dynamics NAV User Guide provides information specifically for installing and using the Exactor Sales Tax Plug-in in the Microsoft Dynamics NAV ERP system.
