

NetSuite Sales Tax Software Solution

OVERVIEW

Exactor provides a highly accurate and reliable, end-to-end Sales, Use, and Value Added Tax solution for businesses of all sizes and verticals. The Exactor sales tax compliance software is a SuiteApp that is fully integrated directly into the NetSuite ERP and NetSuite OneWorld systems to instantly enable comprehensive sales tax automation on all of the ERP and financial accounting modules for both the US and international markets. The Exactor Suite App also supports both the NetSuite SiteBuilder and NetSuite SuiteCommerce Advanced ecommerce platforms ensuring that sales tax is calculated accurately and consistently throughout the transaction lifecycle.

Once installed and setup, a merchant does not need to perform any additional functions calculating sales tax. The taxes are automatically calculated and seamlessly displayed in all transaction forms which require Sales Tax calculation, and because the invoice and sales orders communicate with the Exactor System, the Exactor NetSuite Plug-in generates tax returns without having to transfer data from one system to another. More detailed information about the Exactor Sales Tax Compliance Service including: Account Setup, Account Management, Reports, and Filing Returns are outlined in the Exactor User Guide, available for download from the "Help" tab within the Exactor Merchant Module Website.

NetSuite User Manual provides information specifically for installing and using the Exactor Sales Tax Compliance Plug-in in the NetSuite ERP system.

EXACTOR MICROSOFT DYNAMICS NAV SALES TAX MODULE SOFTWARE FEATURES:

- Flexible pricing for setup and customer service
- Easy installation using Exactor Microsoft Dynamics NAV Plug-in User Guide
- Sales and use taxes are calculated accurately & swiftly
- Address verification service cleans up addresses per USPS standards
- Plug-in operation is transparent while generating and updating invoices, sales orders, credit memos and other Microsoft Dynamics NAV forms
