

osCommerce Sales Tax Software Solution

OVERVIEW

The Exactor sales tax application provides online retailers with sales tax calculations via the software plug-in that can be seamlessly integrated with the osCommerce shopping cart software.

The Exactor osCommerce sales tax solution allows businesses to incorporate and benefit from the Exactor sales tax compliance service within their osCommerce shopping carts. When the Exactor merchant account is enabled, a merchant does not need to perform any additional actions to the taxes calculated. The taxes are seamlessly displayed in the osCommerce shopping cart, and because the shopping cart communicates with the Exactor System, the Exactor System generates tax returns without a merchant having to transfer data from one system to another.
