

Authorize.Net Sales Tax Software Solution

Authorize.Net

OVERVIEW

The Exactor sales tax solution was developed for online merchants to incorporate sales tax calculation on checkout from within the Authorize.net payment processing platform. Once connected and configured, a merchant shouldn't implement any additional functions to get taxes calculated. The taxes are calculated automatically and displayed in the sales orders as they proceed through the payment authorization process. Because the Exactor sales tax solution communicates with the Exactor web service, the online sales tax returns are generated automatically and a merchant doesn't need to transfer data from one system to another.

EXACTOR AUTHORIZE.NET SALES TAX SOLUTION FEATURES:

- Fair setup and service fees
- Quick connection using our Authorize.net Installation & User Guide
- Accurate & secure calculation of sales taxes or VAT
- Address Verification Service
- Comprehensive tax calculations while processing payments
- Sales tax or VAT calculation for every line item in an order, not for the total amount
- Easy to get started – simply enable your Exactor merchant account and connect the Authorize.net sales tax solution.

Exactor is glad to take a chance to offer the PayPal Sales Tax solution and the First Data Sales Tax module to integrate the popular payment gateways with the professional sales and use tax compliance service.
