

# Pinnacle Cart Sales Tax Software Solution

## OVERVIEW

The Exactor sales tax compliance software for Pinnacle Cart allows online businesses to calculate sales tax by using the sales tax module that is fully integrated into the Pinnacle Cart.

The Exactor Pinnacle Cart sales tax compliance module was developed merchants to implement the Exactor sales tax compliance software within their Pinnacle Cart shopping carts. Once the Exactor sales tax application is enabled, a merchant does not need to perform any additional functions for automated sales tax. The taxes are accurately calculated and displayed in the Pinnacle Cart; and because the shopping cart communicates with the Exactor merchant site, the Exactor system generates tax returns automatically and a merchant doesn't need to transfer the data between the systems.
