

PrestaShop Sales Tax Software Solution

OVERVIEW

The Exactor sales tax software solution allows merchants to calculate sales tax via the add-on that can be easily integrated with the PrestaShop shopping cart software.

The Exactor PrestaShop sales tax solution was developed to provide online retailers with benefits of the Exactor sales tax compliance software within their PrestaShop shopping carts. Once registered with Exactor, a merchant can install the Exactor sales tax add-on and get it configured in seconds to start getting sales taxes calculated. The taxes are seamlessly displayed in the PrestaShop shopping cart, and because the shopping cart communicates with the Exactor system, the online sales tax returns are generated without a merchant having to transfer data from one system to another.
