

# X-Cart Sales Tax Software Solution

## OVERVIEW

The Exactor sales tax compliance software for X-Cart allows businesses to calculate sales tax by using a simple plug-in designed for X-Cart merchants.

The Exactor X-Cart sales tax plug-in was developed to enable businesses to incorporate and benefit from the Exactor sales tax compliance service within their X-Cart shopping cart versions. Once installed, a merchant does not need to perform any additional actions to get the sales taxes. The taxes are calculated and seamlessly displayed in the X-Cart shopping cart. Because the shopping cart communicates with the Exactor merchant portal, the Exactor system automatically generates online sales tax returns so that a merchant doesn't need to transfer data from one system to another.

X-Cart User Guide provides information specifically for installing and using the Exactor sales tax compliance plug-in in the X-Cart shopping carts.

- Compatible setup and customer service fees
- Easy installation using our X-Cart Installation & User Guide
- Complete & accurate calculation of sales tax and Value Added Tax
- High-demand Address Verification Service
- Transparent to users during ordering
- Line by line tax calculation for multiple delivery invoices
- Compatible with X-Cart versions 4.3.x – 4.6.x
- Easy to install and configure – download the Exactor X-Cart plug-in from the Exactor merchant account and get it installed and configured in seconds.

Exactor is happy to offer the Zen Cart Sales Tax plug-in and the Commerce Kickstart Sales Tax module to get the popular shopping carts integrated with the professional sales and use tax compliance software.
