ezFile iOS/ Android App
Sales Tax Software Solution

ezFILE

Exactor's ezFile® Sales Tax Compliance Solution provides brick and mortar businesses with a simple, yet effective means of sales tax filing and paying their sales tax returns quickly and securely from a computer or mobile device.

WHO USE ezFILE

ezFile® customers include retailers, restaurants, and service providers that sell products or services onsite at their place of business. They are owners/managers of small to medium sized businesses that want a simple and accurate means of filing and paying their sales taxes as quickly and painlessly as possible so that they can remain focused on running their businesses.

THE PROCESS

Exactor ezFile® users receive a notification on their mobile devices at the beginning of each month to let them know that a return is due. A user will open the ezFile® app, where they will be prompted to enter their total sales information. The app will then calculate the taxes owing, and Exactor will proceed to generate and file the tax returns and remit payment. Users are able to file and pay their sales tax returns in a few short minutes without using a pen, writing a check, or using a complex online sales tax filing service.

BENEFIT OF ezFILE

The ezFile® system provides a simple and accurate system and method for filing and paying sales taxes accurately and on time. It is designed for non-technical owners/managers who wish to minimize the time and effort needed to comply with sales taxes. ezFile® eliminates the need for merchants to become tax experts, fill out a single state or local tax form, or even prepare any checks or online payments to the state and local taxing authorities. The service is fully automated and continually updated each month to ensure that the correct sales tax rates are used and latest forms are filed correctly.

Note that the ezFile® service requires an active Exactor ezFile® account.

exactor®
Your Sales Tax Solution

With over ten (10) years of experience automating sales tax compliance, Exactor is the premier provider of Sales Tax Compliance Services. Exactor's fully automated SaaS System has been revolutionizing transaction-related tax compliance by providing an enterprise level solution for secure, reliable and accurate sales tax compliance efforts, including calculating taxes in all commercial environments, record keeping, tax processing and the generating and filing of tax returns. Exactor's dynamic Software Suite offers a simple and seamless integration of the Exactor Sales Tax Calculation Module into any business and transaction platform where real time calculation is required. The Exactor engine will then automate the process of generating and filing the returns, so that the user can focus on their sales and running the business, trusting Exactor to manage their transaction taxes. The Exactor suite offers a high level of automation, rapid delivery, and highly scalable results, ensuring an on time, on budget, enterprise-class tax solution to fit the needs of any business.
