

Sage 50 Sales Tax Software Solution

Sage 50

OVERVIEW

The Exactor Sage 50 Sales Tax Software was developed to enable businesses to calculate sales tax from within their Sage 50 software in general, and specifically while generating and updating sales orders and invoices. Once installed and setup, a merchant has no need to perform any additional functions to obtain sales taxes. Upon calculating sales tax automatically, it is seamlessly displayed in a sales order or invoice, and because a sales order or invoice communicates with the Exactor System, the Exactor Sage 50 Sales Tax module generates tax returns without a merchant having to transfer data from one system to another.

Sage 50 User Guide provides information on installation and usage of the Exactor Sales Tax plug-in in the Sage 50 ERP system.

EXACTOR SAGE50 SALES TAX MODULE SOFTWARE FEATURES:

- Reasonable setup and customer service fees
- Easy installation using our Sage 50 Installation & User Guide
- Complete & accurate calculation of sales tax
- Address verification service
- Transparent to users while generating and updating invoices, sales orders, credit memos and other Sage 50 forms
- Line by line sales tax calculation for multiple delivery invoices
- Installation is quick and easy. Simply download the Exactor Sage 50 Sales Tax software module from your Exactor merchant account, save locally to your computer, and run the through the installation wizard.

Exactor also offers the Sage 100 Sales Tax plug-in and the Sage 500 Sales Tax module to integrate the Sage ERP systems with the professional sales and use tax compliance service.
