The Exactor engine automates the process of generating and filing returns, so the user can focus on their sales and running the business, trusting Exactor to manage their transaction taxes. The Exactor suite offers a high level of automation, rapid delivery, and highly scalable results, ensuring an on time, on budget, enterprise class tax solution to fit the needs of any business.

*"Exactor is revolutionizing sales tax compliance – it is doing to sales tax what ADP and Paychex did to payroll taxes"*  
J. Barsade, Founder & CEO

### WHAT WE DO

Exactor's patent-pending technology has been developed and extensively tested and evaluated by independent sources. Exactor is one of a handful of companies whose systems have been certified by the [Streamlined Sales Tax \(SST\)](#) organization, a consortium of 41 states whose mission is to streamline sales tax compliance across the board. Designation as a Certified Service Provider (CSP) by the SSTP requires exhaustive system testing for accuracy, security and efficacy using standards as set by NIST, ISO17799 and SAS70. Certification is a seal of approval of the highest level awarded by tax and technology auditors of state taxing agencies, attesting to the accuracy, security and overall integrity of the underlying system. The Exactor systems and processes have also undergone an independent ISO 17799 review.

Exactor deals and manages a very sensitive topic – YOUR TAXES. We recognize the trust that our customers place in us, and preserving that trust, and protecting their information is of utmost concern to us. We rely upon our reputation of high quality product and service, our good name, and the reputation of those channel partners who have chosen Exactor to be the engine that powers sales tax services they are marketing to their customer base.
